HD Tubing And Roll Sheets

Superlon material is a higher density alternative for the regular line of Superlon insulation materials. It is harder, stronger and tougher with a higher tensile strength than other equivalent materials in the market.

Superlon material is highly durable with a shore C hardness of greater than 10 and density greater than 70kg/m³. Furthermore, like all other Superlon products, every piece of Superlon material is engineered, produced and controlled with stringent procedures to ensure quality and effectiveness.

Aluminium Rolls & Sheets

When applications and installation areas require an aesthetically pleasing feel or to protect the insulation from unnecessary impact, aluminium sheets would be the recommended choice. Most commonly used in open ceiling ducting lines and also chiller systems. UV resistant aluminium jacketing is available upon request should the application is under harsh and extreme UV conditions.

Adhesive Rolls & Sheets

For your installation convenience adhesive backing with release paper is available. Adhesive sheets offer the ease of installation with the performance of specifically formulated adhesive lamination without the mess and hassle glue saving you both time and money.
